Presented by: Libah Grossman, Senior Elections Consultant

July 2009

votenet

solutions

- USA headquarters in Washington, D.C
- Libah Grossman manages the Midwest Sales Office
- Ninth Year of business in providing online election solutions
- Over 1,000 online voting clients
- Excellent systems and services

Why Votenet?

- Trusted leader: #1 market share in online voting and a proven, reliable solution
- No additional hardware investment – 100% web based
- 3rd party verification and tabulation – integrity of elections are guaranteed
- Vendor of choice for five of the top 50 global law firms, Association of Fundraising Professionals, Hollywood award shows, Tennessee Medical Association and the American Hospital Association
- SAS 70 certification; Hacker-Safe certification; Interfor certification; Better Business Bureau, and more.
- Continued product and security upgrades
- Single election use or unlimited annual use licenses available

Our Leading Clients:

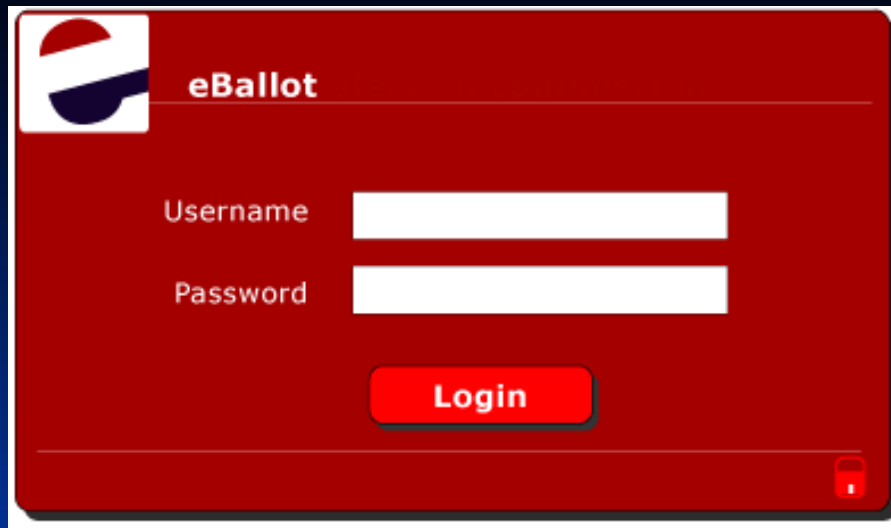

Yale University

A sampling of more clients:

- Directors Guild of America
- United States Institute for Theatre Technology
- Institute of Food Technologists
- Promotional Products Association International
- American Association for the Study of Liver Diseases
- Art Directors Guild
- American Anthropological Association

- Login Security: Ensures eligible voters cast only one vote
- Custom Graphics: Match the look & feel of your website
- Voters can login with usernames and passwords

The screenshot shows a web interface for an eBallot system. At the top, there is a navigation menu with four items: 'Home' (with a house icon), 'Instructions' (with an information icon), 'Ballot' (with a ballot icon), and 'Signout' (with a door icon). Below the menu, a message reads: 'Welcome! You are eligible to vote on the ballot(s) listed below.' followed by the instruction: 'Click on the ballot name or on *view ballot* to proceed.' Below this is a table listing ballot items:

Constitution election	View Results
Proposition Amendment	View Ballot
2005 Regional Ballot	already voted

- Accommodates multiple ballot elections
- Ballots are “grayed out” as soon as a vote has been cast
- 4-step voting process

Jean Bourgain

Jean Bourgain was a studied for his doctorate awarded his Ph.D. in at the Free University of Brussels. Bourgain received the

Gerd Faltings

Gerd Faltings studied at the University of Bonn being awarded his Ph.D. Faltings went to the University of Cambridge for postdoctoral work as a 1978-79.

Bill Thurston

Bill Thurston studied at the University of California, B.S. from there in 1967. He went to Berkeley to undertake his thesis under Smale's supervision. This work showed that every 3-dimensional manifold

Efim Zelmanov

Efim Zelmanov attended Novosibirsk State University, obtaining his Master's degree in 1977. On being awarded this degree he was appointed to the staff at Novosibirsk State University and taught there while continuing with his own research. He received his Ph.D. from Novosibirsk State University in 1980 having had his research supervised by Shirshov and Bokut.

The thesis he presented for his Ph.D. was on nonassociative algebras. In particular his work completely changed the whole of the subject of Jordan algebras by extending results from the classical theory of finite dimensional Jordan algebras to infinite dimensional Jordan algebras. Zelmanov described this work on Jordan algebras in his invited lecture to the International Congress of Mathematicians at Warsaw in 1983.

In 1980 Zelmanov was appointed as a Junior Researcher at the Institute of Mathematics of the USSR Academy of Sciences at Novosibirsk. On the award of his doctorate (habilitation) in 1985, he was promoted to Senior Researcher. He was promoted again at the Institute of Mathematics of the USSR Academy of Sciences in 1986, this time becoming a Leading Researcher.

In 1987 Zelmanov solved one of the big open questions in the theory of Lie algebras. He proved that the Engel identity

$$\text{ad}(y)^n = 0$$

implies that the algebra is necessarily nilpotent. This was a classical result for finite dimensional Lie algebras but Zelmanov solved a big open problem when he proved that the result also held for infinite dimensional Lie algebras.

In 1990 Zelmanov was appointed a professor at the University of Wisconsin-Madison in the United States. He held this appointment until 1994 when he was appointed to the University of Chicago. In 1995 he spent the year at Yale University.
