# Updated Compatible Implementations

Java  
Community  
Process

## ➤ JCP 2.9

### 1.4 COMPATIBILITY TESTING

The Spec Lead is responsible for defining the process whereby the TCK is used to certify implementations of the JSR as compatible. The Maintenance Lead must submit to the PMO at least quarterly a list of all implementations that have been certified as compatible and that have been released publicly or commercially. The PMO will publish this information on the JCP Website. If the Spec Lead submits the information in the form of a pointer to an already published list the PMO may choose simply to reference that list rather than duplicate it.

TCK license terms must permit implementors to freely and publicly discuss the testing process and detailed TCK test results with all interested parties.

## **admin@jcp.org**

For members to get the password for Community Review and the TCK tools as well as answers to questions about EGs and JSPAs.

## **spec-submit@jcp.org**

To submit materials for JSR stages or updates to the JSR detail pages.

## **pmo@jcp.org**

For any general issues and to get answers to all JCP questions.

## **webmaster@jcp.org**

For issues with jcp.org, email and aliases.
