JCP Training - Transparency

WebEx Meeting 24 September 2008

Prepared by: Harold Ogle

Community Development of Java Technology Specifications

★ Introduction

★ JCP tools: Update page, observer alias, updated JSR details

★ Doug Lea on transparency

★ Mihir Kulkarni on transparency

★ Q&A

★ Open discussion

What is transparency?

Java
Community
Process

Transparency refers to the degree that the following are understood and available to the community:

- what the current schedule is
- what is happening between milestones/stages of a JSR
- how the Expert Group is operating
- how the community can provide feedback and be involved in the development of the specification
- what SL/EG communication is available for broad consumption

How do I run a JSR transparently?

Java
Community
Process

Some possible methods:

- Public mailing lists
- Public meeting summaries
- Web journal/blog
- Collaborative site (collabnet, java.net)
- Issue-trackers, wikis

But please make sure to link from the JSR page!

JCP tools: Observer aliases

Java
Community
Process

Observer alias is a mail alias which Spec Leads control, to which any member of the public can request subscription

It is most often used for distribution of announcements concerning the schedule and progress of the JSR, though it could also be used for open discussion.

Instructions for administering the alias are found on the Community Update page.

Each JSR has one: `jsr-xxx-observers@jcp.org`

Updating the JSR page

Java
Community
Process

Each JSR page has three sections: the stage table, the original proposal info, and in between them, the updates section.

Any time you want to post an update to the update section, send mail to admin@jcp.org with the subject line 'Updates to JSR XXX' and the exact text of the update in the body.

Updates can be changes to sections of the original proposal (such as the schedule), as well as information about your progress and links to other sites you may use.

Doug Lea on transparency

Java
Community
Process

Now we'll hear a bit on transparency from Doug Lea, Spec and Maintenance Lead of JSR 166 and long-time EC representative.

Mihir Kulkarni on transparency

Java
Community
Process

Now we'll hear a bit on transparency from Mihir Kulkarni, Oracle's Spec and Maintenance Lead for JSR 289.
